

So, you have an **enlarged prostate.**

## Fishing for a Solution?

*GreenLight™ Laser Therapy is the solution to get you back...  
hook, line and sinker. Ask your doctor today.*

GreenLight Laser Therapy is an outpatient treatment option suitable for most patients with an enlarged prostate. It's creating a new standard of care – a standard that offers freedom from enlarged prostate symptoms without the side effects of medication or risks associated with other invasive surgery options.

GreenLight Laser Therapy is now offered at [insert name of hospital or physician's office]. For more information, please contact [insert name of physician or assistant] at [insert office phone number].

The most common side effects of GreenLight tend to be mild and short lived.
